

Supply Chain Management

VISION

Our vision is to create an efficient supply chain with focus on technology, innovation and collaboration. We empower our suppliers to share responsibility for integrating sustainability and human rights by building their own management systems and internal controls.

APPROACH

- Our approach to supply chain management is collaborative and provides opportunities for digitalisation, innovation, cooperation and mutual growth.
- We upskill and empower our suppliers to share responsibility for integrating sustainability and human rights by building their own management systems and internal controls.
- We exchange ideas, insights for deeper engagement, knowledge acquisition and intellectual development.

STRATEGIC PRIORITIES

- Identify supply chain risk by assessing performance when selecting suppliers and contractors
- Monitoring of all suppliers and thorough assessment of all critical suppliers
- Suppliers' and contractors' Conduct business in alignment with our Supplier Code of Conduct
