

Hindustan Zinc to double metal production to 2 mtpa in 5 years

Vedanta Group firm Hindustan Zinc aims to double its metal production to two million tonnes per annum (mtpa) within the next five years, Chairperson Priya Agarwal Hebbar (*pictured*) said. "With India's expansion in steel capacity and a strong focus on infrastructure, Hindustan Zinc is on track to double its production to 2 mtpa by 2030, as our zinc plays a critical role in steel galvanisation," Hebbar said in a letter to shareholders. The company's current metal production capacity is 1.1 mtpa. The company, she said, is also expanding into critical minerals and has been declared the preferred bidder for several blocks across the country. **PTI**
