Dear Sir(s),

<u>Sub:</u> - Disclosure under Regulation 47 read with Regulation 30 of SEBI (listing Obligations and Disclosure requirements) Regulations 2015 (Copies of Newspaper Advertisement of Audited Consolidated and Standalone Financial Results for the fourth quarter and year ended March 31, 2022 of the Company

Dear All,

In compliance with Regulation 47 read with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find enclosed the copies of newspaper advertisements relating to approval of Audited Consolidated and Standalone Financial Results for the fourth quarter and year ended March 31, 2022 of the Company, published in National level newspaper Business Standard all edition and local newspaper Dainik Bhaskar (Udaipur) and Rajasthan Patrika (Udaipur) on April 23, 2022. The aforesaid results will also be available on the Company's website <u>www.hzlindia.com</u>.

Request you to take the above information on record.

Thanking you,

Yours faithfully

For Hindustan Zinc Limited

dro

(RIPandwal) Company Secretary Encl: as above.

# **EV** adoption may stem forex outgo on oil imports

Currently, imports account for 40–46% of an EV's manufacturing cost

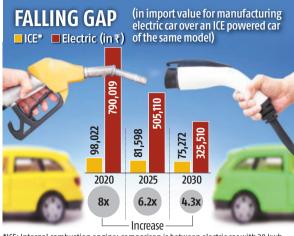

#### SURAJEET DAS GUPTA New Delhi, 22 April

he sharp increase in imported fuel prices could well speed up the day when the overall foreign exchange outflow on an electric car powered by a 30 kwn lithium ion battery will be equal to, or below, that of an internal combustion engines (ICE) car of the same model.

The foreign exchange outflow has two elements. The imported cost for manufacturing an electric car is very high compared to a ICEpowered model. The second element is the operating cost of running the vehicle by using imported fossil fuels through the entire life cycle of an ICE-powered car which is assumed to be 15 years with an average run of 12,000 kilometres annually. An electric car hardly has any operating cost which leads to a foreign exchange outflow in the same period.

that by 2030 Once this happens, the the gap will government will be able to not only be reduce its overall foreign bridged exchange outflow due to a that the import burgeoning fuel import bill cost of an —this is a key goal in pushelectric car will ing electric vehicles, apart be lower than from the need to reduce caran ICE powbon emissions ered car of the

According to Nomura, Its same model. research had pointed out that in 2020, the import cost with the price of an electric car was more of oil breaching than double that of an ICE-powered car (the import prolonged Russia-Ukraine higher cost in manufcturing and also imported fuel cost) of the government is pushing the same model. It had assumed that an ICE car Production Linked Incentive would require around ₹3 lakh scheme, the gap

\*ICE: Internal combustion engine; comparison is between electric car with 30 kwh battery and ICE car of a similar model; assumption: 20% batteries made locally in 2020, 60% in 2030, no motor or motor controller localisation in 2020, 50% in 2025 Source: Nomura

of imported oil (minus all close much faster. Exactly taxes) for the entire life cycle when, though, is difficult of the vehicle. to predict owing to the

But, based on an assumpvolatility of oil prices. tion that oil prices will Nomura's research says manufacturing remain stable throughout, that the the research import cost of

> an electric car According to Nomura, in 2020 was in 2020, the import eight times that cost of an electric of an ICE car of car was more than the double that of an model. In 2025, it **ICE-powered car of** will be the same model. It 6.2 times. In 2030, it will be also assumed an ICE car would require 4.3 times (see **₹3 lakh of imported** chart). The reaoil (minus taxes) for sons are simple: the entire life cycle the benefits of localisation

through local ₹100 per litre due to the supply chain development, electric vehicle war and the speed at which penetration and the proliferation of charging for localisation through the stations will reduce the dependency on imports. Unlike in ICE vehicles, could

same

where localisation in the most popular cars has reached over 80 per cent, the scenario in electric cars is very different.

Industry estimates say that in some of the popular electric cars manufactured here, imports account for 40-46 per cent of the total manufacturing cost. The key components which constitute the bulk of the imports are the cells which go into making the lithium battery and the ion components which go into the making of the motor and the motor controller.

The cost of the lithium ion battery accounts for 43 per cent of the total cost of manufacture and 80 per cent of the cost of making a lithium ion battery is the cells and they are not manufactured in India. A similar percentage of the cost of manufacturing controllers and motors is also imported. Motors and controllers account for 14 per cent of the overall manufacturing cost. Clearly, the government is aware of the large import

dependency in manufacturing electric vehicles which is why it has been pushing for localisation. It is why it has identified eligible players for two Production Linked Incentives schemes: one for the manufacture of electric vehicles and the other for the manufacture of advanced chemistry cells to power batteries. It has also earmarked over ₹18,100 crore as incentives to be given to the players as part of the grand plan for the localisation of advanced chemistry cells batteries.

NOTES :

 The above consolidated results of Hindustan Zinc Limited("the company") and its subsidiaries("the Group") for the quarter and year ended March 31, 2022 have been reviewed by Audit Committee and approved by the Board of Directors in its meeting held on April 22, 2022.

2) During the previous quarter ended December 31, 2021, the company had incorporated its wholly owned subsidiaries namely "Hindustan Zinc Alloys Private Limited" (HZAPL) on November 17, 2021 and "Vedanta Zinc Football & Sports Foundation" (Section 8 company) on December 21, 2021 pursuant to which the Company had prepared its first consolidated financial results in the previous quarter. Accordingly, the comparative figures presented in the consolidated financial results for the quarter and year ended March 31, 2021 represent standalone figures of the Holding Company.

#### 3) Key Standalone Financial information:

	1			(₹ in Crore, ex	cept as stated)
PARTICULARS	Quarter ended			Year ended	
	31.03.2022	31.12.2021	31.03.2021	31.03.2022	31.03.2021
	Audited	Unaudited	Audited	Audited	Audited
Total income from operations	9,074	8,269	7,242	30,656	24,448
Net Profit for the period (before Tax, Exceptional and/or Extraordinary items)	4,358	3,858	3,343	14,235	10,574
Net Profit for the period before Tax (after Exceptional and/or Extraordinary items)	4,358	3,858	3,343	14,101	10,574
