New Delhi: Vedanta Group company Hindustan Zinc Limited (HZL) on Wednesday said it is on track to achieve 30 per cent female representation by 2030. Currently, Hindustan Zinc has more than 25 per cent women workforce. Hindustan Zinc said in a statement that this reaffirms the company's commitment to gender diversity in the traditionally male-dominated industries of metals, mining and heavy engineering.

The company claims to be the first company in India to have women underground mine managers. The company has also set up the first women underground mine rescue teams in the country. Priya Agarwal Hebbar, Chairperson of the company, said, "Our vision is ambitious as well as clear - to accelerate this momentum and achieve 30 per cent gender diversity in the next five years. The increasing number of women pursuing careers in mining and metallurgy is a testimony to this change." Hindustan Zinc is the world's second largest integrated zinc producer and third largest silver producer.
