March 22, 2025

Udaipur, Mar 22 (PTI) Hindustan Zinc Limited has recycled more than 18 billion litres of water in the 2023-24 financial year which is roughly equivalent to the annual water usage of nearly 1 lakh households in the state, the company said on Saturday.

On the occasion of World Water Day, it also announced that it would inaugurate a 4,000 kilolitres per day (KLD) Zero Liquid Discharge plant at Rampura Agucha in Rajasthan's Bhilwara district in the coming week. Rampura Agucha is home to the world's largest underground zinc mining operation.

According to an official, Hindustan Zinc Limited (HZL) has maintained a "zero liquid discharge approach that ensures water and effluent are treated, recycled and reused, significantly reducing its reliance on freshwater while eliminating liquid discharge".
